

PUBLISHING PROCEDURE FOR PRODUCTION TEAM

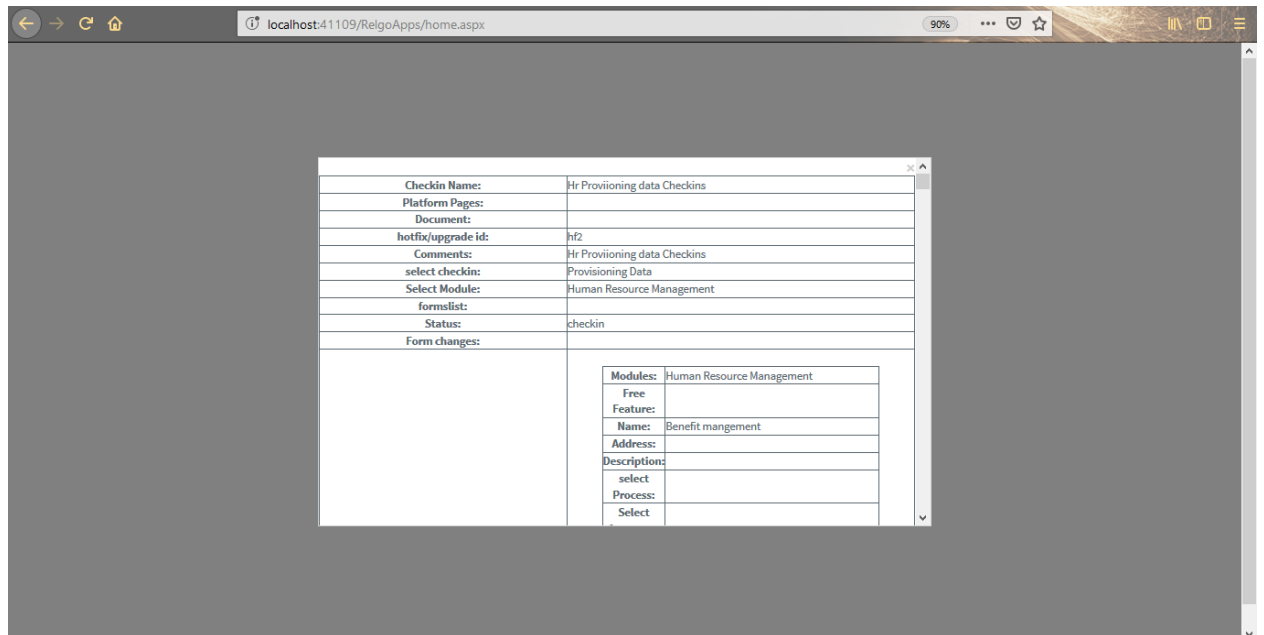

- For production team first login to versioning account where all the check-ins appear in a table which is under tools menu.

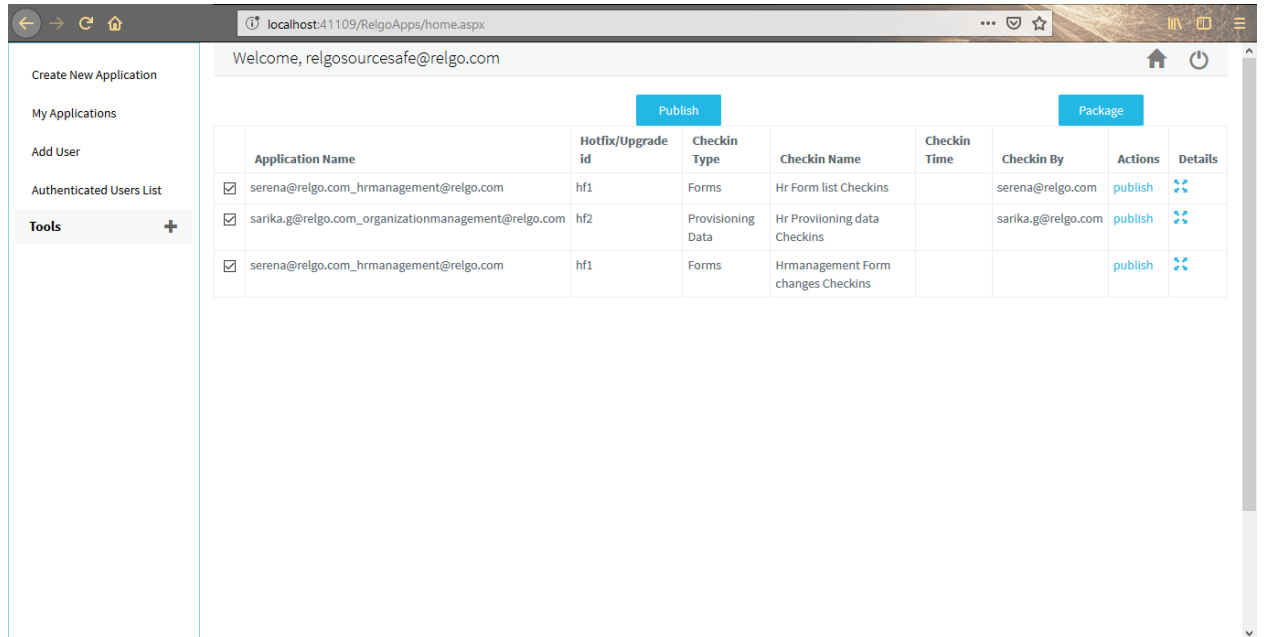

- Click on “publishing to appstore” then below screen will be displayed.

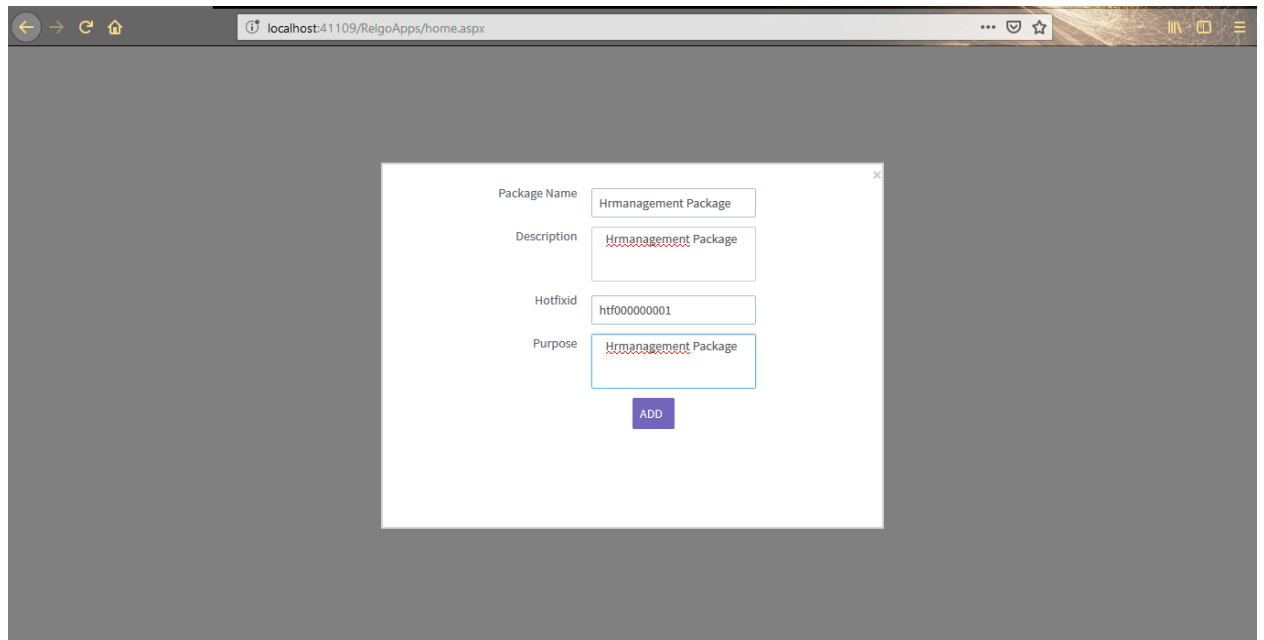

- In this table, checked in data can be seen by developers and analyst.
- To publish them directly to appstore, click on “publish” option.
- To package the forms and data as an upgrade or hotfix, click on “package” option which is shown in above screen.
- To view details, click on the “details” which is shown in below screen.

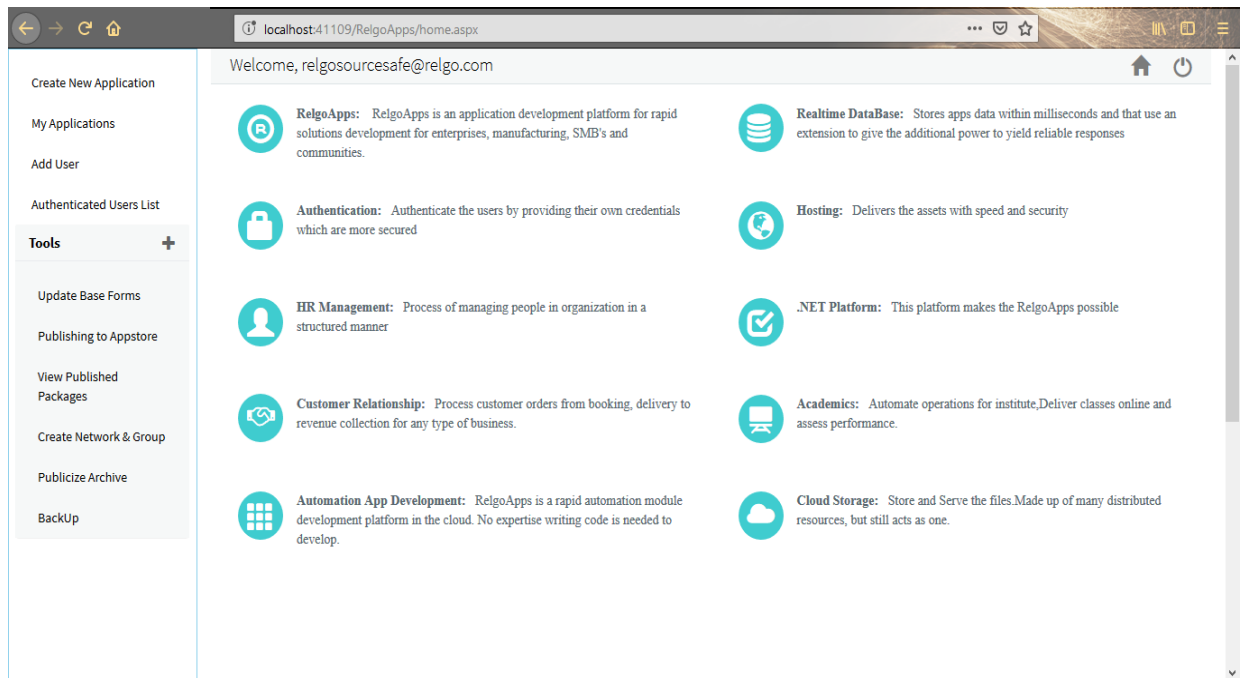

- Production team will select the data which they want to package then click on “package” button.

- Click on “package” and fill the fields like package name, description with hotfix id and purpose then click on “add” button which is shown below.

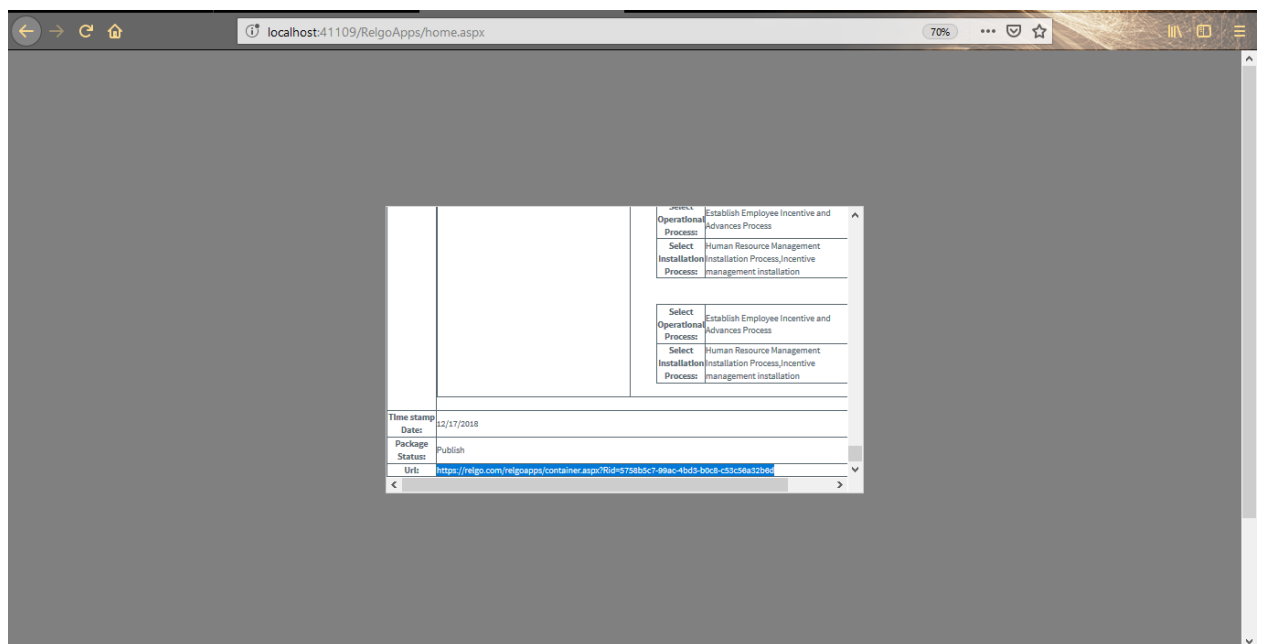

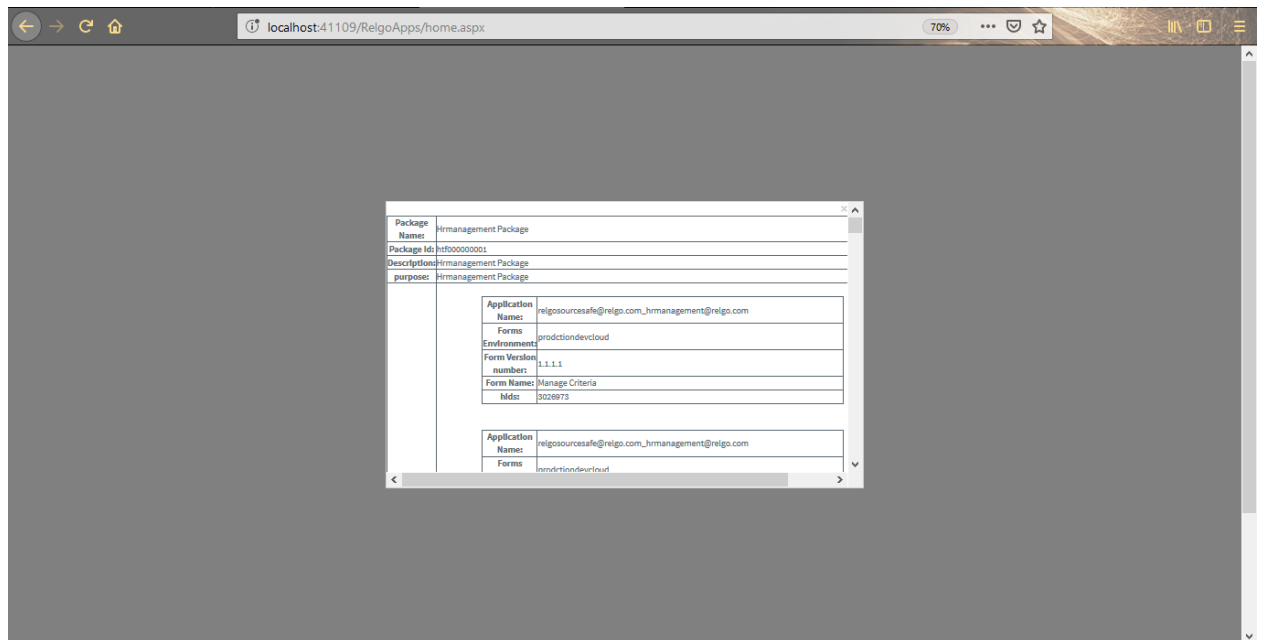

- All created packages will appear in a table which is shown in below screen.

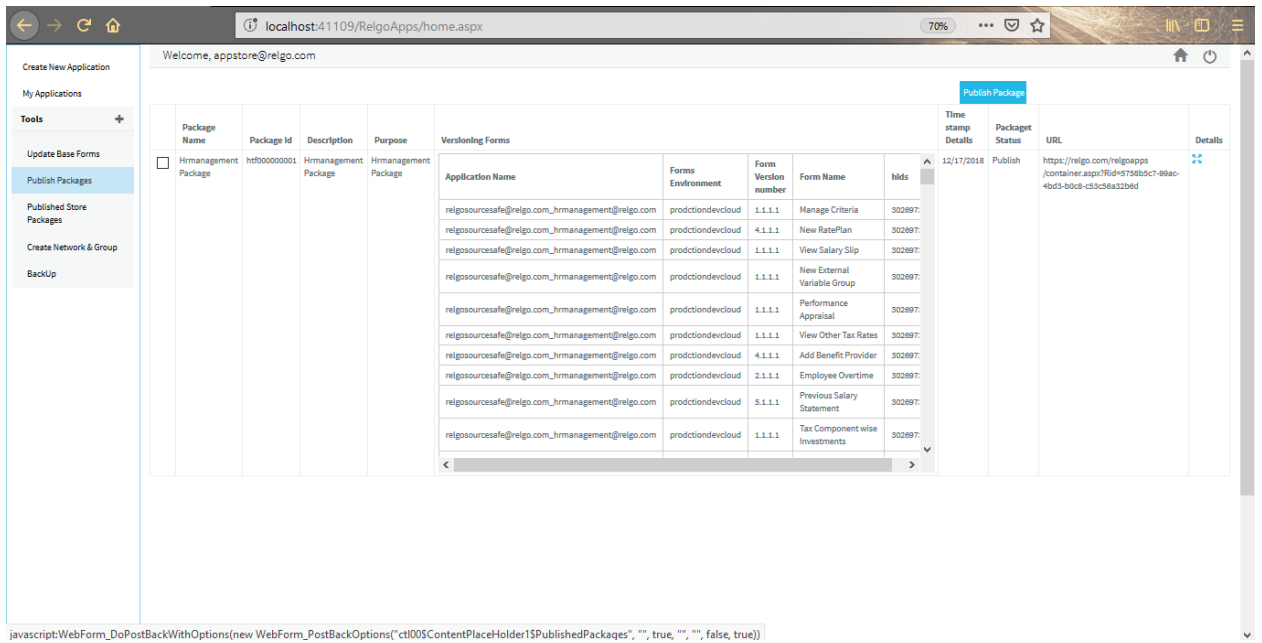

- If we click on view published packages the below screen appears with all the created packages.

Package Name	Package Id	Description	Purpose	Versioning Forms	Time stamp Details	Package Status	De
