

SETUP PRODUCT

New Product:

A Product is an item or service which can be offered for a sale to the customers. We can give prices for products after creating Price group, price name and price value.

Adding Product to Store:

Setup listing charges to publish the third party products and choose particular category to map the product into our Store.

Online Products to Inventory:

In inventory, we can maintain complete details of the Product and we have a provision to add online and offline products to inventory.
