

Introduction To RelgoApps

Purpose:

The main purpose is to provide all the facilities required to support the complete life cycle of building and delivering web applications entirely based on the Business Automation Platform.

For creating forms without writing code we are offering a tool called Relgo Automation Studio – Elastics Apps. Creating a form with the help of these apps is effective and time saving. We have enough variables, methods, actions and events to generate efficient forms.

Objectives:

- Reducing the time to develop the application.
- Ease of application development.
- Building the application instantly.
- Reducing the end user burden (eg: application maintenance).
- Implementing the Cloud Computed concepts.
- Easy to use and deploy on Cloud platform.

Scope:

The tool can be offered to small and medium organizations to develop their applications very fast as the cloud application provides all the Cloud Computing features.

Features:

- Streamline the process.
- Provide services to simplify employee activities.
- Provide consolidated information for easier decision making.
- Easy to use and intuitive.
